MODULE

PROGRESS

	<div>Intro to Academy</div> <div>8 Sections Fundamental General</div> <p>Your first stop in Hack The Box Academy to become acquainted with the platform, its features, and its learning process.</p>	<div>100% Completed</div> <div></div>
	<div>Network Enumeration with Nmap</div> <div>12 Sections Easy Offensive</div> <p>Nmap is one of the most used networking mapping and discovery tools because of its accurate results and efficiency. The tool is widely used by both offensive and defensive security practitioners. This module covers fundamentals that will be needed to use the Nmap tool for performing effective network enumeration.</p>	<div>100% Completed</div> <div></div>
	<div>SQL Injection Fundamentals</div> <div>17 Sections Medium Offensive</div> <p>Databases are an important part of web application infrastructure and SQL (Structured Query Language) to store, retrieve, and manipulate information stored in them. SQL injection is a code injection technique used to take advantage of coding vulnerabilities and inject SQL queries via an application to bypass authentication, retrieve data from the back-end database, or achieve code execution on the underlying server.</p>	<div>100% Completed</div> <div></div>
	<div>Web Requests</div> <div>8 Sections Fundamental General</div> <p>This module introduces the topic of HTTP web requests and how different web applications utilize them to communicate with their backends.</p>	<div>100% Completed</div> <div></div>
	<div>Introduction to Networking</div> <div>21 Sections Fundamental General</div> <p>As an information security professional, a firm grasp of networking fundamentals and the required components is necessary. Without a strong foundation in networking, it will be tough to progress in any area of information security. Understanding how a network is structured and how the communication between the individual hosts and servers takes place using the various protocols allows us to understand the entire network structure and its network traffic in detail and how different communication standards are handled. This knowledge is essential to create our tools and to interact with the protocols.</p>	<div>47.62% Completed</div> <div></div>
	<div>Introduction to Web Applications</div> <div>17 Sections Fundamental General</div> <p>In the Introduction to Web Applications module, you will learn all of the basics of how web applications work and begin to look at them from an information security perspective.</p>	<div>76.47% Completed</div> <div></div>

Intro to Assembly Language

24 Sections Medium General

Medium

General

This module builds the core foundation for Binary Exploitation by teaching Computer Architecture and Assembly language basics.
